SABUROMARU II THE HIGH PRIESTESS

Two in one

Time to open the door to the truth. In 2019, the world's first cast pot still "ZEMON" started operation at Saburomaru Distillery. Manufactured with the casting technology of Takaoka Copperware, which has a long history and tradition, this distillation still is highly durable, and the dual effects of copper and tin have resulted in a mellow and refined sake quality. The innovation was patented in Japan and the UK, fulfilling my childhood dream of becoming an inventor. Copper and tin. And the spirits created by the combination of the two, the first distillation and the second distillation, are truly immaculate vessels. How the future will be drawn, this is the true start.

SABUROMARU DISTILLERY
Takahiko Inagaki

Distilled 2019 Bottled 2022
Mashtan: Miyake Industries Co.,Ltd.
Still: ZEMON Distiller
