

JODHPUR GIN

ELABORATION PROCESS

13 BOTANICALS

TASTING NOTE

London Dry Gin 43%

Produced in the oldest distillery in England, Jodhpur Gin is made from select grain alcohols and a carefully-chosen assortment of **13 botanical plants**, including emblematic ones **native from India**, giving the gin a blend of bitter yet also fresh and sweet notes, a scent of spices and a delicious **citrus** fragrance.

In keeping with the **London Dry Gin** production process, Jodhpur Gin undergoes **four distillations**, the last distillation with citrus mash added to the still, thereby imbuing **Jodhpur** with character and turning it into a top-quality gin

TASTING NOTE

Aroma

Elegant and fine on the nose, aromatic with delicate and all-enveloping notes of wild berries, such as juniper, with a subtle background of citrus & aromatic herbs. Rather sharp but very balsamic.

Sensation on swallowing

Very aromatic finish with considerable and very long, balsamic notes, and a long aftertaste.

Flavour

Very smooth and unctuous, with reminiscences of juniper berries rounded off with flavors of other aromatic herbs. A slight touch of citric resins and alcoholic flavor, very fine due to its excellent distillation.
