

ONE PAGE SUMMARY

In a former life, the part of our distillery where this whisky matured had been a weaving shed (and the distillery as a whole had been a mill). So, in our more nostalgic moments, we think of our Oloroso sherry casks as looms of flavour interlacing the characteristics of their former occupant – a dry nutty sherry – with those of the new inhabitant – our soft, single malt, we replete with treacle toffee and fruit, the whisky is a sensual treat.

We only use high quality ingredients sourced from local farms to craft our unique whisky. Expertly combined, they give Deanston a soft, sweet & honeyed character that truly embodies our industrious spirit.
