CHINNERY

OUR NAME HONOURS GEORGE CHINNERY'S ARTISTIC CELEBRATION OF CHINESE CULTURE

Our name celebrates George Chinnery (1774–1852), an English portrait artist who spent much of his life in China, capturing everyday life and culture. Our whisky mirrors those deep cultural connections, blending the promise of Eastern whisky with the heritage of Western distillation and maturation. Like Chinnery paintings, this whisky embodies tradition, adventure and cross-cultural storytelling, honouring his creative spirit.

CHINA

FROM THE LAND WHERE DISTILLING ALCOHOL BEGAN

钱纳利

China's distilling tradition dates far back to the first and second centuries with production rooted in specialities such as Baijiu. China has more recently moved into whisky production, establishing distilleries in diverse climates, combining local ingredients with international expertise to craft unique whiskies. Chinnery is born and raised in the Hunan province in south-east China, an area renowned for its rich and diverse terroir.

TERROIR

OUR WHISKIES ARE BORN AND RAISED IN THE RIVER CANYON BASIN OF LIUYANG IN THE HUNAN PROVINCE

The Liuyang river canyon basin has three distinct natural advantages.

1. Famously fertile soils are ideal for growing the barley and maize required to make our whiskies. 2. Ancient underlying shale rock provides an abundance of pure soft water for production. 3. Year round rain and mist create an ideal environment for maturation with smoother integration of flavours and better wood interaction.

GRAINS

OUR SIGNATURE BLEND IS MADE EXCLUSIVELY FROM LOCALLY GROWN MALTED BARLEY & MAIZE

We start with our single grain whisky made from maize. The maize provides a light, sweet and smooth character, creating the perfect canvas upon which we build our flavour profile. The malt whisky is made from locally grown barley which is malted (non-peated) and double distilled to retain maximum grain character.

DISTILLERY

OUR WHISKIES ARE DISTILLED, MATURED, BLENDED & BOTTLED IN A STATE-OF-THE-ART GRAIN & MALT WHISKY DISTILLERY IN LIUYANG

Opened in 2021, the 30,000m² facility has 5 x 5,000ltr sets of copper pot stills used to make the single malt component of our signature blend. Accompanying the pot stills are a series of high-capacity column stills producing the single grain expression of whisky that serves as the canvas for our signature flavour profile.

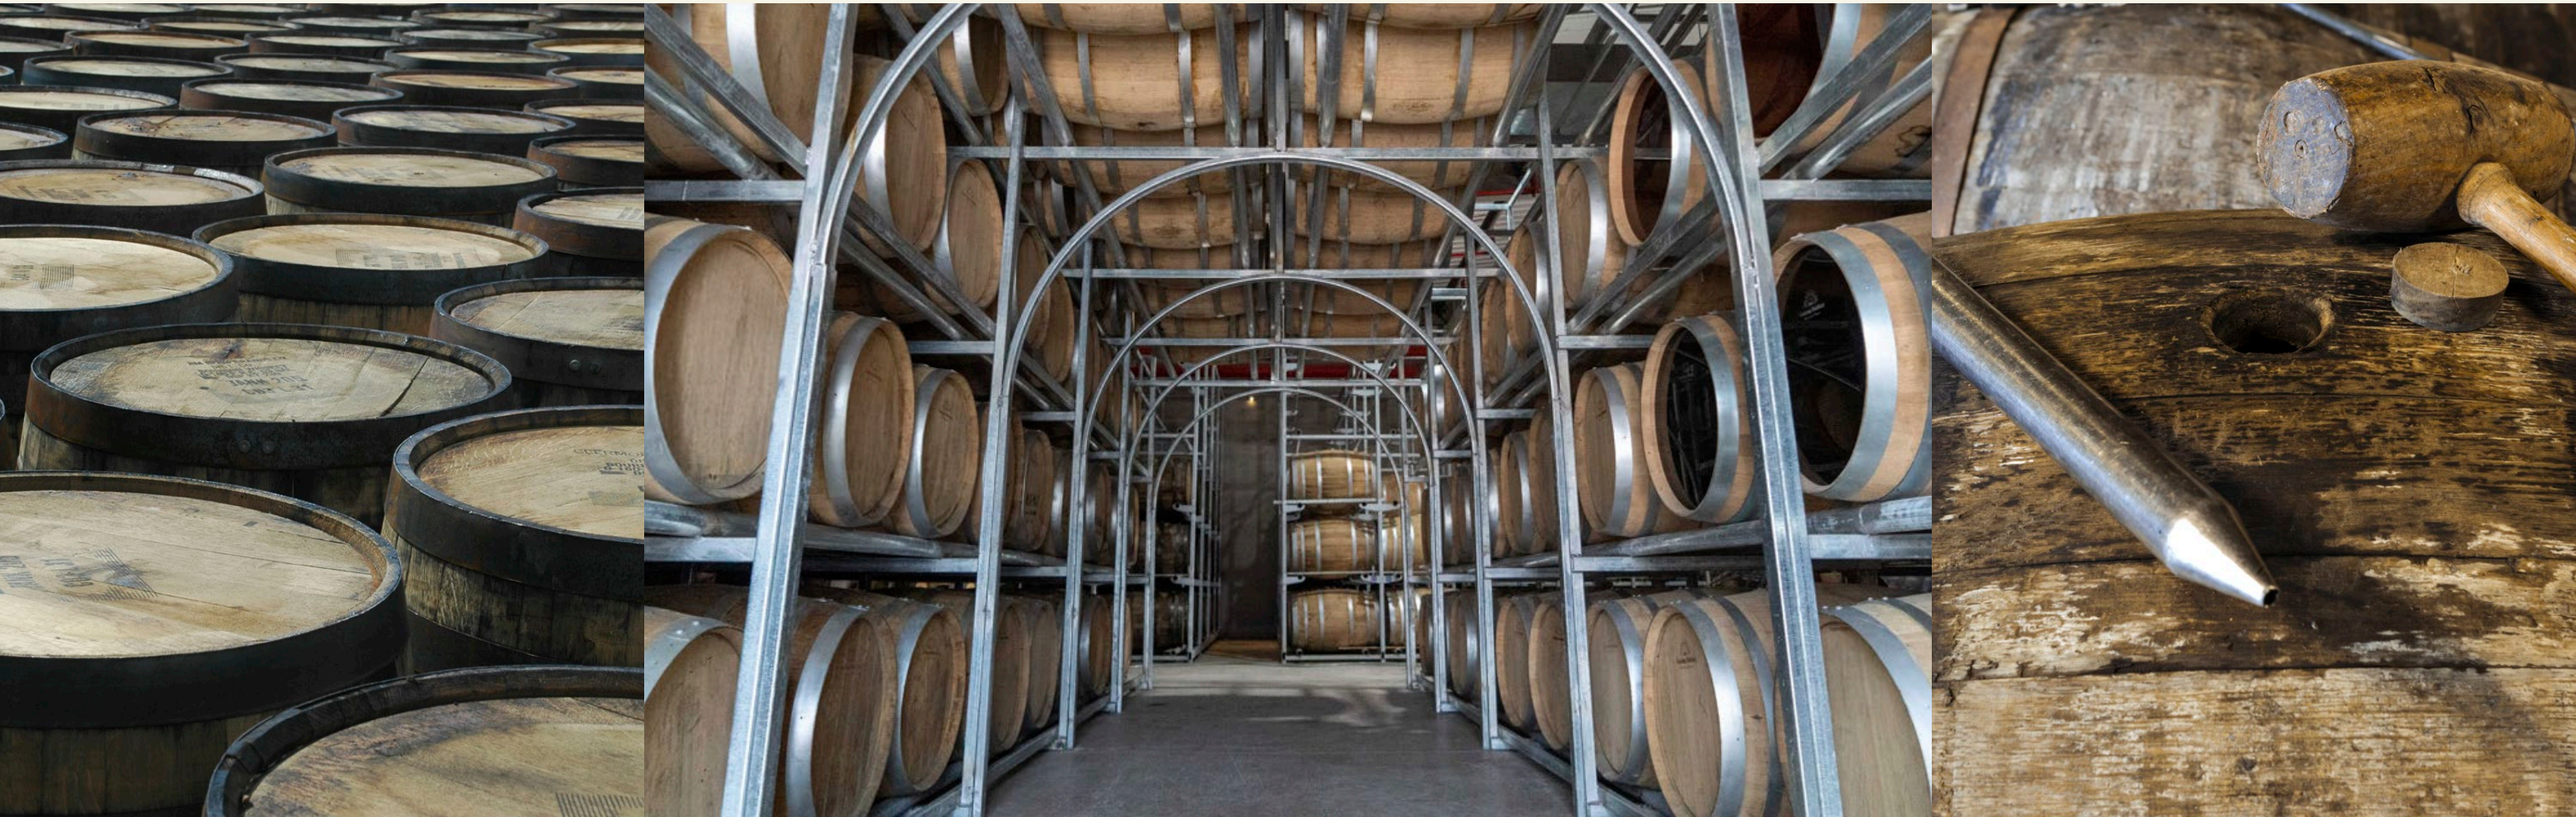

MATURATION & BLENDING

FINALLY EAST MEETS WEST & OUR LIUYANG RIVER CANYON SPIRIT RESTS IN AMERICAN OAK EX-BOURBON CASKS

Our maturation profile is inspired by a familiar global palate. First and second fill bourbon casks are carefully selected and re-charred, ready to receive both our column distilled grain whisky and double distilled malt whisky. These casks then rest until ready in the humid climate of Liuyang, layering notes of soft vanilla cream, toffee and baking spice into our already nuanced spirits. Our final step is the art of the blend, marrying both whisky styles in one flavoursome expression.

PACKAGING

A CELEBRATION OF CHINESE AESTHETIC

Elegant and refined, our bottle is inspired by a passion for traditional Chinese ceramics topped off with a luxuriously weighted turn-cap closure. The red accents are linked to the element of fire, symbolising our whisky, life, energy and renewal.
